

You are invited to join a discussion about the
Transition to Sustainable Food Systems

CLOSING

Feeding Our Communities Amid Climate Change & Peak Oil

A Talk & Community Conversation
to envision and plan our future Kansas food system

led by *David Yarrow*, food & farm activist

www.dyarrow.org/Kansas

7:00pm Tuesday, November 22

Learning for Life Center

1709 SW Randolph Ave, Topeka, KS 66604

Sliding Scale \$15 - \$30

Learn about **LIFE: Locally Integrated Food & Energy**

The first service any community must deliver is food every day,
and enough energy to cook that food.

How do we put fertility in soil in an era of high energy prices?

Who will grow food to feed 21st Century communities?

Where is the next generation of farmers?

How will they farm without energy and chemicals?

Modern food supply is owned by a few industrial corporations whose priority is profit.

**Our responsibility is to build a sustainable Kansas food
system that cares for our communities first.**

David Yarrow challenges us to begin this effort now
to assure community food security in uncertain times.
